MDSS II v7.2 MAGTF DATA LIBRARY (MDL) UPDATE

Date: 26 January 2009

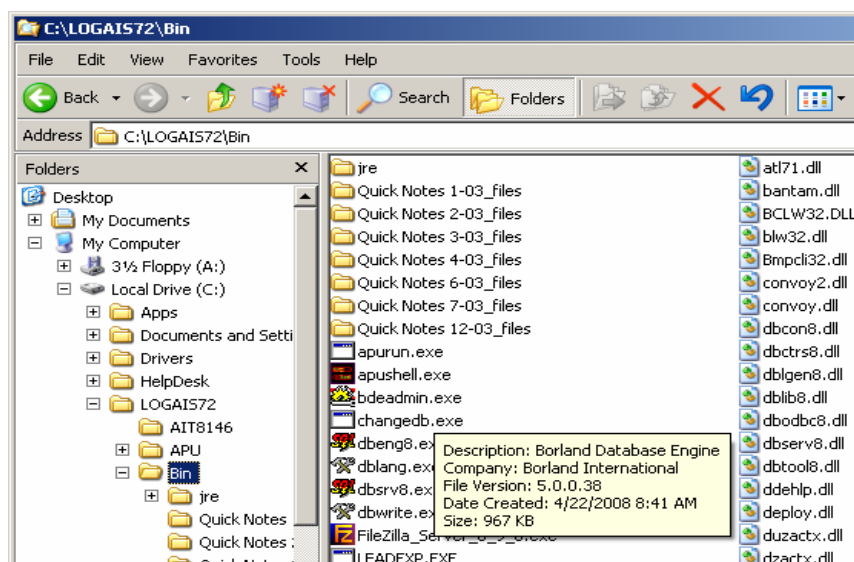

Quick Notes Objective: To provide the operational forces a concise guide on how to perform a
                                        MDL update.

All MDL updates will be done by using a one-way external interface with the ability to utilize the most current reference data in day-to-day and deployment situations in MDSS II. MDSS II users can access the most current reference data for MDSS II by internet download and following the instructions below. This update will refresh the MDSS II database with the most current MDL data. Records that have been added by the user will not be affected by this update. For example, if a user has added a record to the Tech Data table, it will still be in the table after the update has been completed.

MDSS II DATABASE BACKUP

NOTE: This is a precautionary step in case the MDL update does not work properly. <u>Ensure MDSS II is not running on your computer before continuing</u>.

1.   Select <**My Computer**>, <**C:\ drive**>, <**LOGAIS72**> and the select the <**Bin**> folder.

TECHNICAL ENGINEERING & ASSISTANCE TEAM   **QUICK NOTES 1-08**
HELPDESK INFORMATION
TE&AT EAST   (910) 554-9992   TDIS_EAST_SUPPORT@NGC.COM
TE&AT WEST (760) 439-4278   TDIS_WEST_SUPPORT@NGC.COM

2. In the Bin folder, locate the file <**Logais.db**>. This is the MDSS II Data Base File. Copy (**do not Cut**) this file.

libjsybheap.dll	35 KB	Application Extension	2/14/2003 4:23 PM
localsql.cnt	3 KB	CNT File	10/25/2001 12:35 PM
Logais.db	180,688 KB	Data Base File	6/4/2007 10:17 AM
logais.log	4 KB	Text Document	6/4/2007 11:17 AM

2.   On the desk top, create a "new folder" and paste the "Logais.db" back-up file inside of it. The user will also save the MDL .zip file to this folder.

3.   Go to the following website: ***www.marcorsyscom.usmc.mil/SITES/TDIS***.   Select <**MDSS II**> and then select <**MDL Update**>. Select each of the MDL720X.zip files under the MAGTF LOGAIS 7.2 column and <**Save**> to the folder you created in step two.

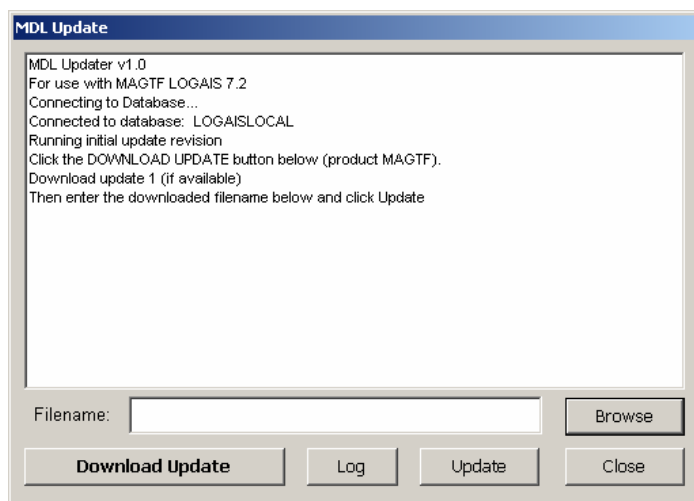

NOTE: The user will be able to install these files on a standalone computer by transferring these files to the standalone computer.

MDL UPDATE

The following files (MDL72XX.zip) require the use of the new MDL Update utility found in your MAGTF-LOGAIS 7.2 program. These are partial updates that must be applied in sequence. Use the "Browse" button in the "MDL Update" window to find the folder created where updates were saved to and select the next update file in sequence to load and then press the "Update" button to perform the action. When all files are imported using the "MDL Update" window, then the reference data is up to date. Ensure you do not skip any files. The MAGTF LOGAIS user community will be notified via e-mail of new changes.

1. Select <**Start**>, <**Programs**>, <**MDSS 7.2**>, <**MDL Update**> and <**Browse**>.

2. Navigate to the location where the saved the MDL720X.zip files are. Select by double clicking the next MDL720X file to be updated (Figure 1). Select <**Update**> (Figure 2) to start the automatic update. These **files must be uploaded into MDSS II in sequential order.**
